From the Newark Centinel? Astonishing .- Not long ago I asserted in the town of Newark, in the presence of a number of inhabitants, who were speaking of interest, that one cent at six per cent per annum, compound interest, would in 1800 years amount to ten thousand times the bulk of the earth in solid gold. Some who were present seemed to discredit the assertion. I have since made a calculation, and now state as follows in round numbers less than true. The amount of one cent at the rate before mentioned for 1800 years exceeds 35,540000,0000000,000 0000 000000,000000,000000,000000 dollars;* and supposing the earth to be 8000 miles in diameter and 100 dollars of gold to make a cubic inch, it would exceed 2729,000000,0000. oot times the cube of the earth's diameter, or it would make a block 1118,000000 miles in length, width David Young. and height.

MURDER.

On the 24th ult. John Boles, a foot passenger, on his way from Natchez, through the nation was shot as is supposed, by a young Indian about 3 1-2 miles this side the Chickasaw agency. The grounds of the supposition are these: The day before about six miles below the agency a young Indian who was intoxicated overtook a company of travellers, one of whom was the deceased-one of the party turned upon him and chased into a swamp. He returned from the swamp and followed them within a mile of the agency where they lodged that night. Next morning Boles was shot by some person the swamp and part the place before from the woods at the place before stated. There was but one in company with him at the time. The probability is, that the Indian took Boles for the person who chased him as they were the only two of the company who carried bundles on sticks. We received our information from the person who chased the Indian, but who was half a mile in the rear when Boles was shot .-

At the Old Bailey Sessions, on the 8th May, the recorder passed sentence of death on thirty two persons, four of whom were females. At the same time eleven were sentenced to transportation for life; one for 14 years, and seventy two for a shorter period. Thirty were ordered for imprisonment from 6 to 12

IMPORTANT CESSION.

It is stated in the Canada papers, that the Missisagua Indians have ceded to the British government a tract of 2,748,000 acres of land, equal in extent to 46 townships. It is said that this tract embraces that elegant river, the Mississippi, from its source until its entrance into the Lake Chandiere, or Ottawa river.'

We have had the perusal of the Muster Roll of the United States ship Franklin, Commodore Stewart, at present in the Mediterranean .-Her full complement consists of 777 souls; and what is equally surprising and pleasing is, that out of this great number; there are but ten on the sick list. This circumstance is certainly highly creditable to the discipline and economy of the thips police. [Phil. Gaz.

The 74 building at the navy-yard in this city progresses rapidly. Philadelphia paper,

A vessel, with stores for our squadron in the Mediterranean, is about to sail from George-town, D. C. Those who wish to embrace this opportunity of sending letters to persons in the squadron, must forward them on to George-town post paid.

PUBLISHED BY AUTHORITY.

A Supplement to a By-Law fentilled, A By-Law to appoint city Commissioners and Port Wardens in the city of Annapolis and to/limit their several duties and powers.

several duties and powers.

Be it established and endance of the Mayor, Recorder, Aldernen, and Common Council; of the City of Immapolis, and the authority of the same. That the city commissioners and port vardens be and they are hereby authorised and empowered to sell so much of the personal property now belonging to the corporation, or which may belong to it hereafter, as in their opinion may be expedient, and that they pay over to the treasurer of this corporation the proceeds of the same.

ceeds of the same.

And BE IT ESTABLISHED AND ORDAINS AND BE IT ESTABLISHED AND ORDAIN-ED BY THE AUTHORITY APORESAID.
